SUBJECT INDEX TO VOLUME 5

Advection, numerical treatment of, 439
Approximation, of one-dimensional heat transfer with and without phase change, 223

Buoyancy-driven fluid flow and heat transfer, in interacting vertical parallel channels, 39

Calculation of turbulent heat transport downstream from abrupt pipe expansion, 493
Concentric vertical cylinders, natural convection in space between, 119
Conduction equation, physical approach to finite-difference solution of, 1
Contact interface temperature, with internal thermal radiation and conduction effects, numerical solution of, 359

Finite-difference schemes, for parabolic differential equations, 199
Finite-difference solution, of conduction equation in generalized coordinates, physical approach to, 1
Finite-element solution, of incompressible Navier-Stokes equation, 463
Fluid flow and heat transfer, in pair of interacting vertical parallel channels, 39
Free convection, between two parallel flat plates, heat transfer by, 95

Heat transfer:
- by conduction and radiation in one-dimensional medium, 353
- by free convection between two parallel flat plates, 95
- for general, scattering, plane-parallel media, 21
- around horizontal cylinder within confining walls, 329
- to low-Prandtl-number fluids in pipes, 107
- with reflection, 309
- in pair of interacting vertical parallel channels, 39
- survey on, 39

Heat transfer rates, in natural convection at high Rayleigh numbers in rectangular enclosures, 81
Horizontal cylinder:
- heat transfer around, 329
- natural convection from, 479

Hyperbolic heat transfer, with reflection, 309

Incompressible Navier-Stokes equation, finite-element solution of, 463

Laminar boundary-layer heat transfer, instant nonsimilarity solutions of, 299
Laminar free convection, from vertical plate with nonuniform surface conditions, 165
Laminar natural convection, along vertical square ducts, 59
Low-Prandtl-number fluids in pipes, results on heat transfer to, 107

Mixed convection flow over inclined surfaces, thermal instability of, 343
Mixed time integration schemes, for transient thermal analysis, 211

Natural and mixed convection heat transfer, around horizontal cylinder within confining walls, 329
Natural convection:
- heat transfer rates in, at high Rayleigh numbers, 81
- from horizontal cylinder at small Grashof numbers, 479
- in space between concentric vertical cylinders of different height and diameter, 119

Nonlinear conduction, self-adaptive closed constrained solution algorithms for, 253
Nonlinear inverse heat conduction problem, sequential solution of, 275
Nonsimilarity solutions, of unsteady laminar boundary-layer heat transfer, 299
Numerical and approximate numerical solutions, to three-dimensional mixed convection boundary-layer flow, 287

Numerical calculation, of two-dimensional natural convection in isothermal open cavities, 421
Numerical heat transfer, survey on, 369
Numerical methods, for evaluation of radiant energy transfer in scattering and heat generating media, 235
Numerical solution, of contact interface temperature with internal thermal radiation and conduction effects, 359
Numerical study, of effect of vertical temperature difference imposed on horizontal enclosure, 185
Numerical techniques, in radiative heat transfer for general, scattering, plane-parallel media, 21
Numerical treatment of advection, 439

One-dimensional heat transfer with and without phase change, approximation of, 223

Parabolic differential equations, finite-difference schemes for, 199
Polynomial approximation solution, of heat transfer by conduction and radiation in one-dimensional medium, 353

Radiant energy transfer, in scattering and heat generating media, numerical methods for evaluation of, 235
Radiative heat transfer, numerical techniques in, 21
Rectangular enclosures, heat transfer rates in, 81

Self-adaptive closed constrained solution algorithms, for nonlinear conduction, 253
Sequential solution, of nonlinear inverse heat conduction problem, 275

Thermal instability, of mixed convection flow over inclined surfaces, 343
Three-dimensional mixed convection boundary-layer flow, numerical and approximate numerical solutions to, 287
Transient thermal analysis, mixed time integration schemes for, 211
Two-dimensional natural convection, in isothermal open cavities, numerical calculation of, 421
Turbulent flow, in wide-angle diffusers, calculation of, 145
Turbulent heat transport, downstream from abrupt pipe expansion, calculation of, 493

Vertical plate, with nonuniform surface conditions, laminar free convection from, 165
Vertical square ducts, laminar natural convection along, 59
Vertical temperature difference, imposed on horizontal enclosure, effect of, 185

Wide-angle diffusers, calculation of turbulent flow in, 145
